

ADOPTIONS

The following index comes from the Bureau of Conveyance Grantee and Grantor books dating from 1847 to 1900.

The original books are only indexed by Grantor and Grantee. We have indexed these records by the child's name.

Sometimes there will be duplication. We felt it was better to have duplication than to omit some records. This was not done for our personal gain only to help you!

How to read index:

Book, is the book or volume number the original document is recorded in.

Page, is the page number in the original book.

Date, is the date that the document was recorded.

Child, is the child's name of who is being given to another family. They are listed in the column titled 'Description'.

Age, in some cases there was a birthdate or age listed for the child being adopted.

Isl, is short for Island. This is to tell you what Island this adoption is documented.
